## Terms of Use

### Proprietary Statement

This manual contains proprietary information of Zebra Technologies Corporation and its subsidiaries ("Zebra Technologies"). It is intended solely for the information and use of parties operating and maintaining the equipment described herein. Such proprietary information may not be used, reproduced, or disclosed to any other parties for any other purpose without the express, written permission of Zebra Technologies.

### Product Improvements

Continuous improvement of products is a policy of Zebra Technologies. All specifications and designs are subject to change without notice.

### Liability Disclaimer

Zebra Technologies takes steps to ensure that its published Engineering specifications and manuals are correct; however, errors do occur. Zebra Technologies reserves the right to correct any such errors and disclaims liability resulting therefrom.

### Limitation of Liability

In no event shall Zebra Technologies or anyone else involved in the creation, production, or delivery of the accompanying product (including hardware and software) be liable for any damages whatsoever (including, without limitation, consequential damages including loss of business profits, business interruption, or loss of business information) arising out of the use of, the results of use of, or inability to use such product, even if Zebra Technologies has been advised of the possibility of such damages. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

# About This Document

## Introduction

This guide provides information about developing applications for Zebra Workstation Connect.

**IMPORTANT:** If you have a problem with your equipment, contact Zebra Global Customer Support for your region. Contact information is available at: [zebra.com/support](https://zebra.com/support).

## Configurations

This guide covers the following configurations:

Configuration	Description	Device Compatibility
CRD-TC5X-1SWS-01	<p>TC5X Workstation Docking Cradle Kit with Std Cup, HDMI, Ethernet and multiple USB Ports.</p> <p>Included in kit:</p> <ul style="list-style-type: none"><li>• Cradle (CRD-TC5X-1SWS1-01),</li><li>• Power Supply (i.e. PWRBGA12V50W0WW)</li><li>• DC Cable (i.e. CBL-DC-388A1-01).</li></ul> <p>Country specific AC line cord sold separately.</p>	All TC5X Mobile Computers including the TC51, TC56, TC52 and TC57.

## Service Information

If you have a problem with your equipment, contact Zebra Global Customer Support for your region. Contact information is available at [zebra.com/support](https://zebra.com/support).

When contacting support, please have the following information available:

- Serial number of the unit
- Model number or product name
- Software/firmware type or version number

## About This Document

Zebra responds to calls by email, telephone or fax within the time limits set forth in support agreements.

If your problem cannot be solved by Zebra Customer Support, you may need to return your equipment for servicing and will be given specific directions. Zebra is not responsible for any damages incurred during shipment if the approved shipping container is not used. Shipping the units improperly can possibly void the warranty.

If you purchased your Zebra business product from a Zebra business partner, contact that business partner for support.

# Installation

The Zebra Workstation Connect leverages Android Desktop Mode to present the user with a desktop-like interface when connecting a mobile device to an external monitor via a workstation cradle. This guide describes the necessary steps to enable Desktop Mode and utilize the features of the Zebra Workstation Connect solution.

## Default Mirror Mode

After installing the Android OS **11-12-22.00-RG-U00-PRD-HEL-04 ( ET56 ) OR 11-12-20.00-RG-U00-STD-HEL-04 (TC5ax)**, the device uses Mirror Mode as the default when the device is docked in a Zebra Workstation Cradle and connected to a HDMI monitor. If Mirror Mode is the required view mode, no further actions are required. To evaluate the features for Zebra Workstation Connect follow the steps on the section below.

## Zebra Workstation Connect Installation

Users can install the Zebra Workstation Connect onto the mobile device by manually downloading the application, downloading via StageNow or XML.

### Process 1: Manual Installation

1. Install the Zebra Workstation Connect APK onto the Mobile Device.

The Zebra Workstation Connect APK is required to be installed on the mobile device and provides features that enhance the user experience on an external monitor (secondary screen).

The APK (com.zebra.workstationconnect.apk) file can be installed on device following a standard process. For example: adb install <path to> com.zebra.workstationconnect.apk or save the file on the device and run it directly.

2. Grant the Zebra Workstation Connect APK permission on the mobile device.

After the installation of the Zebra Workstation Connect APK, it is necessary to grant permission to display it over other applications. To enable this, tap and hold the Workstation Connect application icon on the mobile device screen and select the option below:

App Info > Advanced > Display over other apps > Allowed

### 3. Enable Desktop Mode on the Mobile Device

After the installing the Zebra Workstation Connect APK, it is required to enable the following system settings on the mobile computer:

- a. Enable Developer Options: Settings > About Phone > Build number 5 times
- b. Enable Desktop Mode on the Menu: Settings > System > Advanced > Developer Options

**NOTE:** If applications being used are not designed to be resizable, enable **Force activities to be resizable**. Reviewing the behavior of all applications is recommended when utilizing Zebra Workstation Connect and enabling this option.

### 4. Perform a Device Reboot Prior to Docking the Device into the Workstation Cradle

Once the device is rebooted, docked into the Workstation Cradle, and connected to HDMI monitor, the screen of the mobile device displays the home screen and allows the user to launch and run applications. Simultaneously, the external monitor displays the home screen of Zebra Workstation Connect.

For additional information on installation and enablement using StageNow or XML, see [techdocs.zebra.com/stagenow](https://techdocs.zebra.com/stagenow).

## Process 2: Installation and via StageNow

Prior to the steps below, install StageNow v.5.2.0.1032 or higher and create a StageNow profile.

1. Configure an applicable network where the Zebra Workstation Connect APK can be downloaded over Wi-Fi.
2. Download the Zebra Workstation Connect APK to a suitable location on the mobile device using FileMgr. Refer to [techdocs.zebra.com/stagenow/2-2/csp/file/](https://techdocs.zebra.com/stagenow/2-2/csp/file/) for more information about the usage of FileMgr.
3. Install the Zebra Workstation Connect apk using AppMgr Refer to the following link for more information about the usage of AppMgr including installing an apk on the device: [techdocs.zebra.com/stagenow/3-1/csp/app/](https://techdocs.zebra.com/stagenow/3-1/csp/app/)
4. Grant Zebra Workstation Connect APK permission to **Display over other apps** using AccessMgr. For more information, refer to [techdocs.zebra.com/mx/accessmgr/](https://techdocs.zebra.com/mx/accessmgr/).

Refer to the image below for more information about the usage of AccessMgr, including granting permissions to an application:

**Permission Access Action:** ?

Grant Permission to an Application ▼

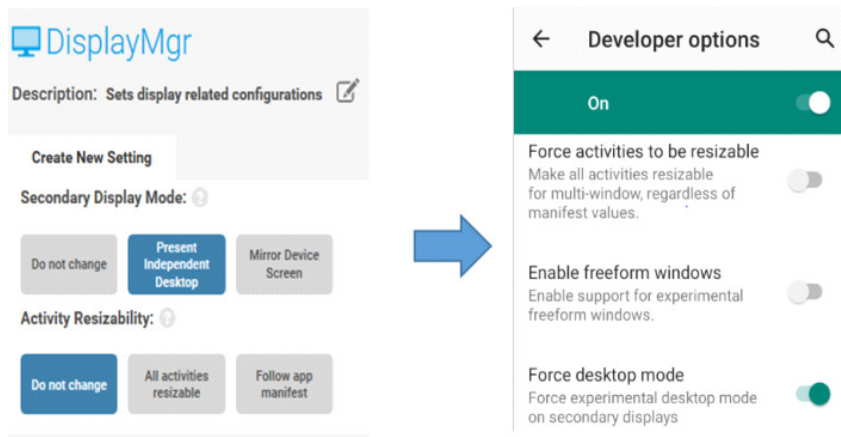

**Permission Name:** ?

System Alert Window ▼

**Application Package Name:** ?

com.zebra.workstationconnect %

5. Enable Desktop Mode on Mobile Device using DisplayMgr. Refer to the image below for additional information about the usage of DisplayMgr, including the enablement of Desktop Mode on the mobile device:

6. Perform a device reboot prior docking device in the workstation cradle using PowerMgr

**NOTE:** if an existing StageNow profile is used, the steps above can be incorporated into it, however a device reboot should be specified as the last step to happen.

Once the StageNow profile is created, a barcode can be generated and scanned to set-up the steps above on the mobile device.

Once the device is rebooted, docked into the Workstation Cradle, and connected to HDMI monitor, the screen of the mobile device displays the home screen and allows the user to launch and run applications. Simultaneously, the external monitor displays the home screen of Zebra Workstation Connect.

### Process 3: Installation via XML

Use an EMM to download and install the Zebra Workstation Connect APK on the mobile device

Through an application follow the steps below

1. Detect when Zebra Workstation Connect APK is installed
2. Submit the following XML to MX to grant the Zebra Workstation Connect APK permission to **Display over other apps**:

```
<!--Set permission Via AccessMgr for ZWC -->
<characteristic version="10.4" type="AccessMgr">
    <parm name="PermissionAccessAction" value="1" />
    <parm name="PermissionAccessPermissionName"
value="android.permission.SYSTEM_ALERT_WINDOW" />
    <parm name="PermissionAccessPackageName"
value="com.zebra.workstationconnect" />
    <parm name="PermissionAccessSignature"
value="MIID6TCCAtGgAwIBAgIJAjQ0WgV07V6QMA0GCSqGSIb3DQEBBQUAMIGKMQswCQYDVQQGEwJVUzE

</characteristic>
```

3. Submit the following XML to MX to enable Desktop Mode on the mobile Device using DisplayMgr:

```
<!--Set desktop mode Via DisplayMgr-->
<characteristic version="10.5" type="DisplayMgr">
    <parm name="SecondaryDisplayMode" value="1" />
    <parm name="ActivityResizability" value="1" />
</characteristic>
```

4. Submit the following XML to MX to perform a device reboot prior to docking the device into the Zebra Workstation Cradle:

```
<!--Reboot Device-->
  <characteristic version="10.1" type="PowerMgr">
    <parm name="ResetAction" value="4" />
  </characteristic>
</wap-provisioningdoc>
```

**NOTE:** If other steps are implemented on the application, a device reboot will be required.

Once the device is rebooted, docked into the Workstation Cradle, and connected to HDMI monitor, the screen of the mobile device displays the home screen and allows the user to launch and run applications. Simultaneously, the external monitor displays the home screen of Zebra Workstation Connect.
